HEALTHCARE OPERATIONS, TRANSFORMATION & ANALYTICS EXECUTIVE

Healthcare Performance Improvement | Enterprise Transformation | Healthcare Operations | Value-Based Care | Enterprise Analytics | Executive Leadership

EXECUTIVE PROFILE

Healthcare operations, transformation, and analytics executive with more than 18 years of leadership experience across integrated delivery systems, academic medical centers, government healthcare ecosystems, payer organizations, pharmaceutical environments, and healthcare consulting organizations throughout the United States, United Arab Emirates, Saudi Arabia, and India.

Recognized for leading enterprise transformation initiatives that improve operational performance, strengthen governance, optimize care delivery, and support data-driven decision-making across complex healthcare environments. Extensive experience partnering with executive leadership teams, physician leaders, operational stakeholders, and regulators to align healthcare strategy with measurable organizational outcomes.

Brings a unique combination of healthcare administration, public health, enterprise analytics, operational transformation, and clinical informatics expertise supporting healthcare modernization, performance improvement, and value-based care initiatives.
